

NCS2018 wishes you all the best for this new year!

We hope to see you all in October for the Non-Clinical Statistics conference!

We would like to thank you for your participation to the survey we sent out a few months ago! Your numerous answers helped us focus on the topics that respond best to your interests.

From the survey, the main scientific topics that retained your attention were:

- **Chemical Manufacturing and Control**
- **High Dimensional data**
- **Statistical methodologies with a preference to some topics that were proposed (i.e. multivariate analysis, DoE, Bayesian and sample size)**
- **Use of Non-clinical studies in decision making process**
- **Statistics and communication**

You were 80% to answer “YES” to the question: “would you be interested in a half-day course?”,

with an interest to the following topics: multivariate analysis, DoE, predictive models and Bayesian Statistics.

All of this, provides you indications of the trends for our futur conference.

Registrations are now open!

We are pleased to inform you that you may now register to the conference, including or not, participation to the social event that will be organized on October 4th. For registration, go check our website www.ncs-conference.org!

Submit now your abstract!

You can send us your own abstract for the conference related to the topics listed within this flyer (prefered) or to another subject that you would like to share.

Send your abstract to registrations@ncs-conference.org

Please let us know if you would rather share your case within a poster session
